

### Project Executable Files

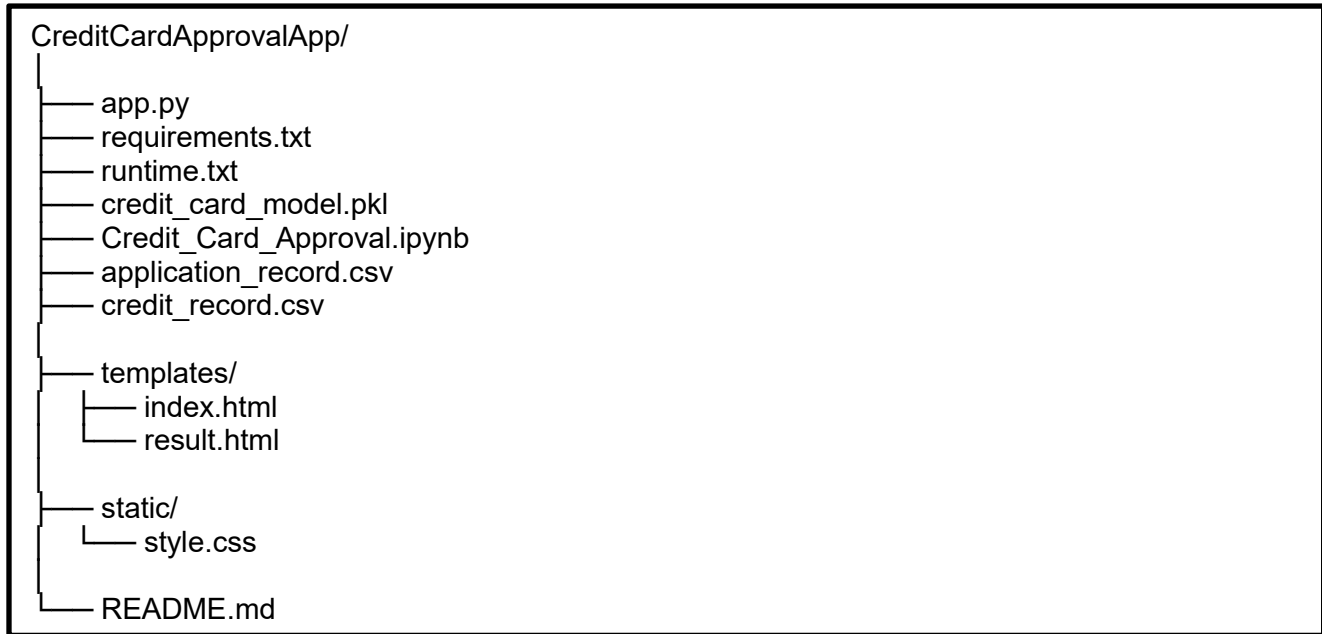

|                      |                                 |
|----------------------|---------------------------------|
| <b>Date</b>          | 13 July 2026                    |
| <b>Team ID</b>       | xxxxxx                          |
| <b>Project Name</b>  | Credit Card Approval Prediction |
| <b>Maximum Marks</b> | 3 Marks                         |

### Project Executable Files

#### Step 1: Submission Checklist

| S.No | Item to Submit                                                  | Submitted (Yes / No / NA) |
|------|-----------------------------------------------------------------|---------------------------|
| 1    | Complete source code (all files and folders)                    | Yes                       |
| 2    | README / Setup Guide (instructions to run the project)          | Yes                       |
| 3    | requirements.txt / package.json / dependency file               | Yes                       |
| 4    | Database schema / seed files (if applicable)                    | NA                        |
| 5    | Environment configuration file (.env.example or similar)        | Yes                       |
| 6    | Deployed application URL (if hosted)                            | NA                        |
| 7    | APK / Executable binary (if applicable for mobile/desktop apps) | NA                        |
| 8    | Dockerfile / Containerization config (if applicable)            | NA                        |
| 9    | Test files and test results                                     | Yes                       |
| 10   | Demo video or walkthrough (if required)                         | Yes                       |

## Step 2: File / Folder Structure

## Step 3: Deployment / Access Details

| Field                              | Details                                                                                                                                                                             |
|------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Hosted / Deployed URL</b>       | <a href="https://creditcardapprovalapp.onrender.com">https://creditcardapprovalapp.onrender.com</a>                                                                                 |
| <b>Login Credentials (Demo)</b>    | Not Required                                                                                                                                                                        |
| <b>Platform / Hosting Provider</b> | Render                                                                                                                                                                              |
| <b>Repository Link</b>             | <a href="https://github.com/MahalakshmiReddy18/CreditCardApprovalApp">https://github.com/MahalakshmiReddy18/CreditCardApprovalApp</a>                                               |
| <b>Demo Video Link</b>             | <a href="https://drive.google.com/file/d/1zQZJphlKkW7dzGkem-Z-s_UHBgBJT4h5/view?usp=sharing">https://drive.google.com/file/d/1zQZJphlKkW7dzGkem-Z-s_UHBgBJT4h5/view?usp=sharing</a> |

## Step 4: Run Instructions

1. Clone the GitHub repository.
2. Install the required packages using:  

```
pip install -r requirements.txt
```
3. Run the application using:  

```
python app.py
```
4. Open a web browser.
5. Visit:  
<http://127.0.0.1:5000>
6. Enter applicant details.
7. Click Predict to view the result.

## Step 5: Known Issues / Limitations

| S.No | Known Issue / Limitation                   | Workaround / Status                             |
|------|--------------------------------------------|-------------------------------------------------|
| 1    | Prediction depends on the training dataset | Future improvement: Train with a larger dataset |
| 2    | No user authentication                     | Can be added in future versions                 |
| 3    | No database storage                        | Database integration can be added later         |
