

Coding & Solution

Date	13 July 2026
Team ID	xxxxxx
Project Name	Credit Card Approval Prediction
Maximum Marks	5 Marks

Solution Summary

Field	Details
Repository Link / URL	https://github.com/MahalakshmiReddy18/CreditCardApprovalApp
Render Link/URL	https://creditcardapprovalapp.onrender.com
Programming Language(s)	Python, HTML, CSS
Framework(s) Used	Flask, Bootstrap, Scikit-learn
Key Features Implemented	• Credit card approval prediction • User-friendly web interface • Machine Learning model integration • Input validation • Instant prediction result
Pending / Incomplete Features	• User authentication • Database integration • Prediction confidence score • Admin dashboard
Setup / Run Instructions	1. Clone the GitHub repository. 2. Install the required packages using requirements.txt. 3. Run the application using: python app.py 4. Open the browser and visit: http://127.0.0.1:5000 Yes

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Yes

Additional Notes / Comments:

- The project successfully predicts credit card approval using a trained Machine Learning model. It is deployed as a Flask web application with a clean user interface and is available through GitHub for version control.
